

Mosquito Patrol Home Checklist

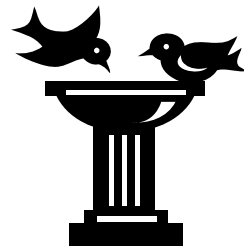

Listed below are some places where you might find mosquito larvae in your yard. Look for each item in the list with your parent or guardian and put a check in the correct box or boxes. Where else might you find mosquito larvae?

	We found these:	We checked for water and emptied these:	We didn't find any of these:
Tires			
Toys			
Flower Pots			
Children's Pools			
Tarps			
Cans or Jars			
Wheelbarrows			
Buckets			
*Pet Water Dish			
*Rain Barrels			
*Bird Baths			
**Boats			
**Rain Gutters			

*Refilling with fresh water will prevent mosquitoes from laying their eggs in these containers.

** Check these only with an adult's help and use caution.

After emptying containers such as wheelbarrows, toys, and pools turn the container upside down. This will prevent mosquitoes from breeding there again. **Remember to get help from an adult when patrolling your home.**
