

Website:

An aerial application for mosquito control is planned. A granular product (resembling kitty litter) will be applied to standing water, by low flying fixed wing aircraft, for the control of immature (larval aquatic stage) mosquitoes by the Warren County Mosquito Control Commission. The product is VectoBac GS, active ingredient *Bacillus thuringiensis* subspecies *israelensis* also known as *Bti*.

**** This application notification is based on the significant rainfall that fell July 28, 2026, our staff is still conducting inspections for larval mosquito activity, so it is possible that aerial treatments will not take place in all of the areas indicated. ****

Date(s): July 31, 2026, alternate date August 1, 2026
